

Health Care Services

The Department of Public Health provides services to all Philadelphia residents. This includes people who do not speak or read English as their first language.

You can get services regardless of your immigration status. Any information that you share with them will remain private and confidential.

To speak with someone who can speak your language, please call 215-686-5200 (Monday - Friday, 8 am to 5 pm) or [311](#)

Insurance

City health centers accept Medicare, Medicaid (Medical Assistance) and most insurance and HMO plans. **If you are uninsured, they charge a small fee based on family size and income.**

They can help you apply for [health insurance](#) you can afford.

As a registered patient, you will get your own personal doctor. It's a much better way to get medical care than going from doctor to doctor or rushing to the emergency room when something goes wrong.

Services

- diagnosis and treatment of chronic and acute illnesses
- medical check-ups and medications for enrolled patients
- prenatal care
- family planning and pregnancy options counseling
- comprehensive pediatric care for infants, children and teens
- immunizations for infants, children and teens
- children's developmental assessments
- healthy weight nutrition counseling for children and teens
- nutrition counseling and health education
- flu shots
- HIV, STD, and STI testing
- basic dental care, emergency dental care
- lab tests, x-rays and tests for tuberculosis
- referrals to specialty services for enrolled patients
- social work support that connects patients to follow-up care, education/ counseling and other services

Some services are available on a walk-in basis.

Services for non-English speakers

They offer translation and interpretation services in City health centers for patients and their families.
